Long Term 2 Enhanced Surface Water Treatment Rule Sample Collection Form

Utility information	Shipping information	For Lab Use Only
PWS name: PWS address:	Accurate Testing Labs , LLC 7950 Meadoelark Way Suite H Coeur d'Alene, ID 83815	Date received:
		Time received:
		Received by:
		Sample temperature on receipt:
		Sample condition on receipt:
Sampler name:	Date shipped: tracking number:	
Sample Identification Information (the combination of bolded items are used to identify the sample under LT2)		
Sample ID (optional)		
PWS ID:		
Facility ID:		
Facility name:		
Sample collection point ID:		
Sample collection point name:		
Sample collection date:		
Source water type * (circle one):	Flowing stream (FS) DWUDI ** - FS	Reservoir/lake (RL) GWUDI ** - RL
Requested analysis (circle one):	Cryptosporidium field sample Cryptosporidium matrix spike E. coli	
Sample Collection Information		
Cryptosporidium		E. coli
Initial meter reading (field-filtered samples only)		Sample collection time
Final meter reading (Field-filtered samples only)		Turbidity (NTU):
Sample collection time (or start time, if field filtering):		
Sample collection stop time (field filtered samples ony):		
Source water temperature:		
Additional comments:		
Sampler signature:		Date:

*The source water type should be selected based on the type of source water that accounts for the majority of the surface water used as source water at the time of sample collection

**Ground water under the direct influence of surface water

Note: E. coli sample **must** be kept cool - below 10 degrees celsius (50 degrees fahrenheit)
